1. IDENTIFICATION

Product Name: H1.2 Boron treated timber

Other Names: Tru-Core® treated timber, NZ H1.2
Boron (boric) treated pine

Use: Borate treated timber for framing (H1.2).

Supplier: Kop-Coat NZ Ltd
Address: Suite 302, Geyser Building, 100 Parnell Road, Auckland 1052
PO Box 3878, Shortland Street, Auckland 1140

Telephone: 07 343 6304
Emergency phone: 0800 764 766 [National Poisons Centre]
111 [Fire, Ambulance, Police]

2. HAZARDS IDENTIFICATION

Product is a manufactured article so is not classified as hazardous according to Schedules 1 to 6 of the Hazardous Substances (Minimum Degrees of Hazard) Regulations 2001 of the HSNO Act, 1996.

HSNO Classifications: -
Signal word: -
Hazard Statements :
Precaution Statements :

3. COMPOSITION : Information on Ingredients

4. FIRST AID MEASURES

For advice, contact National Poison Centre (Phone New Zealand: 0800 764 766) or a doctor. Have Safety Data Sheet at hand.

Swallowed:
An unlikely route of exposure. Rinse mouth with water and seek medical advice.

Skin Contact:
Wash affected area with soap and water. If irritation or redness develops, seek medical advice.

Eye Contact:
Wood dust is mildly abrasive to eyes. Immediately flush the eye continuously with gently flowing water for 15 minutes. Do not attempt to remove contact lenses. If irritation or pain persists then get medical attention.
**Inhalation:**
If dust is inhaled, remove person to fresh air. Encourage person to blow their nose to ensure clear breathing passages. Rinse mouth with water to help remove dust. If irritation persists get medical attention.
If fumes or combustion products are inhaled, then move person to fresh air and keep warm and rested. If breathing is shallow or has stopped, ensure airway is clear and use resuscitation. Obtain immediate medial attention.

**First Aid facilities:**
Provide eye bath and hand washing facilities.
**Advice to Doctor:**
Treat symptomatically.

---

### 5. FIRE FIGHTING MEASURES

** Suitable extinguishing media:** Water.
** Hazards from combustion products:** Carbon dioxide, carbon monoxide, nitrous oxide, ammonium chloride, ammonia.
** Precautions for fire fighters and special protective equipment:** Self-contained breathing apparatus with full face-piece and protective clothing.

### 6. ACCIDENTAL RELEASE MEASURES

**Emergency Procedures:**
Wear appropriate personal protection equipment; closed in footwear, gloves, protective overalls.
**Methods and materials for containment:**
Solid timber product; any hazardous will be related to physical hazards.

---

### 7. HANDLING AND STORAGE

**Precautions for safe handling:** Read Safety Data Sheet before use. Cutting, planing and any machining to be in well-ventilated area. Observe good personal hygiene practices and recommended procedures including wearing of personal protection equipment. Avoid breathing wood dust and skin contact with freshly treated timber surfaces. Wash hands and exposed skin thoroughly after handling.

**Conditions for safe storage:** Store in dry well-ventilated place. Observe manufacturers storage and handling recommendation. No smoking nor exposure to other ignition sources.
BORATE TREATED TIMBER must be held under cover or protected from the weather once treated, when dispatched, transported and prior to use. Prevent prolonged or repeated exposure of timber to rain. Water run off from timber surfaces may lead to depletion of the borate preservative from the treated timber.

**Incompatible materials:** Fire; wood is a combustible material and will burn when exposed to heat and flame.
**Other:** Changing out of work clothing and showering recommended at the end of each work shift. Wash contaminated work clothes separately from other household clothing.

---

### 8. EXPOSURE CONTROLS: PERSONAL PROTECTION

**Health Exposure Standards:** Workplace Exposure Standards (WES), have been set by Worksafe NZ for components in this product.
H1.2 Boron treated Timber Safety Data Sheet

Date of Issue: 19th November, 2015
Date of Review: November, 2020

Emergency Number: 07 343 6304

Wood dust; softwood (sensitiser)  
WES-TWA 5 mg/m³  
WES-STE 10 mg/m³

Borate compounds:  
Borates, tetrahydrate, sodium salts  
anhydrous  
decahydrate  
pentahydrate  
WES-TWA 1 mg/m³  
WES-TWA 5 mg/m³  
WES-TWA 1 mg/m³

Manufacturers’ recommendation:  
Disodium octaborate tetrahydrate  
WES-TWA 5 mg/m³

Biological limit values: None established

Engineering Controls:  
Ventilation: Use in well-ventilated area. Effective dust extraction and good ventilation is required when sawing or machining any timber. Local exhaust/mechanical ventilation is necessary for when working in an enclosed or a confined space. Ventilation is necessary to control atmospheric concentrations below exposure limits and to avoid build up of fine dry wood dust which may form explosive mixtures with air.

Personal Protective Equipment:  
Respiratory Protection: Avoid breathing wood dust. When cutting, machining or sanding timber, wear a disposable dust mask that covers the mouth and nose.

Eye Protection: When sawing or machining timber wear safety glasses with side shields. Contact lenses pose a special hazard; soft lenses may absorb irritants.

Skin/Body Protection: Wear protective gloves, safety footwear, overalls or apron to protect from abrasion. Avoid contact with wood ash. At industrial treatment plants, avoid skin contact with treated timber that is freshly treated or still damp with the treatment solution. If freshly treated timber is to be handled, wear impervious gloves, e.g. neoprene or nitrile, and other impervious clothing, e.g. apron, to prevent contact with skin or clothes.

9. PHYSICAL AND CHEMICAL PROPERTIES

<table>
<thead>
<tr>
<th>Property</th>

</tr>
</thead>
<tbody>
<tr>
<td>Appearance</td>
<td>Machined or sawn timber; H1.2 may have pink/red surfaces</td>
</tr>
<tr>
<td>Flashpoint</td>
<td>Not applicable</td>
</tr>
<tr>
<td>Basic density g/cm³</td>
<td>~ 0.40 – 0.60 range</td>
</tr>
<tr>
<td>Autoignition Temperature °C</td>
<td>Not determined</td>
</tr>
<tr>
<td>Volatiles</td>
<td>Not determined</td>
</tr>
<tr>
<td>Solubility in Water</td>
<td>Not applicable</td>
</tr>
<tr>
<td>pH</td>
<td>Not available</td>
</tr>
</tbody>
</table>

10. STABILITY AND REACTIVITY

Chemical Stability: Stable under normal conditions.
Conditions to avoid: Heat and flame; wood is a combustible material.

Hazardous decomposition products: Thermal decomposition may produce toxic vapours/fumes; carbon dioxide, carbon monoxide, nitrous oxide, ammonium chloride, ammonia.
Hazardous reactions: None specified.
11. TOXICOLOGICAL INFORMATION

**Ingestion:** An unlikely exposure route.

**Eye Contact:** Wood dust is mildly abrasive to the eyes, as is untreated wood.

**Skin Contact:** As for untreated wood, prolonged or repetitive contact or exposure to elevated wood dust levels of some wood species to skin may cause an allergic skin reaction in susceptible individuals. Contact with freshly treated wood (damp surfaces) may cause skin irritation. Handling dry timber surfaces (either treated or untreated) without gloves, may lead to discomfort or result in splinters in skin.

**Inhalation:** Wood dust may block nasal passages resulting in a cough, sneezing or headaches.

**Chronic Effects:** Borate compounds have been classified by EPA as suspected of damaging fertility or the unborn child. This classification was a consequence of male reproductive effects observed in laboratory animals force fed high concentrations of boron compounds.

Get medical advice if exposed or concerned.

**Other Health Effects Information:** Main exposure routes are by contact with skin, inhalation of dust from machining or cutting timber, and from exposure to compounds released into the air when timber is burnt. These potential hazards also apply to untreated wood. Wood dust of some wood species, even if untreated, can also be a respiratory sensitiser.

**Toxicological Information:**
Disodium octaborate tetrahydrate LD$_{50}$, oral (rat) 2550 mg/kg

12. ECOLOGICAL INFORMATION

Prevent prolonged or repeated exposure of treated timber to rain. Rain wash off of timber surfaces may lead to depletion of the borate preservative from timber and over time contaminate unprotected ground.

13. DISPOSAL CONSIDERATIONS

**Disposal Methods:** Bundle or collect timber, off-cuts, shavings or sawdust for recycling or disposal. Consult the Regional Council for disposal options for this product.

Treated timber MUST NOT be used as fuel for open fires, cooking fires, barbeques fuel, home heating, animal bedding or garden mulch.

**Special Precautions for Landfill or Incineration:** Disposal of this product must comply with any National, Regional or District authority requirements.

### 15. REGULATORY INFORMATION

**Country:** New Zealand  
**Inventory:** NZ IoC  
**Status:** Hazardous components listed

**HSNO Act 1996:**
**EPA New Zealand Approval Codes:** Not applicable to Treated Timber however the timber product contains components that have approvals;  
HSR000911 Borate salt  
HSR000117 Bazooka®  
**HSNO Controls:** Refer to [www.epa.govt.nz](http://www.epa.govt.nz) for information on Controls specific to these substances.

### 16. OTHER INFORMATION

**Date of Issue:** 19th November 2015  
**Reasons for Issue:** New Safety Data Sheet.  
**Replaces:** Not applicable.

**Abbreviations:**
- **GHS** Global Harmonised System  
- **NZIoC** New Zealand Inventory of Chemicals  
- **STEL** Short Term Exposure Limit (15 minute exposure period)  
- **TWA** Time-Weighted Average (8 hours exposure period)  
- **WES** Workplace Exposure Standard

**References:**
- **EPA** [www.epa.govt.nz](http://www.epa.govt.nz)  
- **Supplier Safety Data Sheet**

**Other:**
Treated Timber manufactured to meet the specifications for hazard classes H1.2 in accordance with NZS 3640:2003 including subsequent amendments.

The information contained herein is given in good faith but no warranty, expressed or implied is made.
